2 Pole LED Voltage Tester

Key Benefits

- Clear oversize luminous LEDs shine through voltage level
- Clear audible tone
- UK Specific GS38 Slender probe tips NO NEED to swap ends
- Bright torch light - gives ample illumination
- Fits into recessed terminals such as RCBOs without unscrewing any caps
- Phase Rotation - Bright green LEDs show left or right rotation.

Indicates actual voltage if no batteries fitted

Two pole testers that use batteries should indicate a live circuit if the batteries die or have not been inserted into the tester.

This is normally indicated by a single LED but this does not indicate the actual voltage present.

The KT1780 & KT1790 have a separate circuit so they operate with no batteries or dead batteries and still indicate the actual voltage present.

Key Features

- AC & DC Voltage tests up to 690V
- Clear Oversize luminous LED indication
- Soft to touch overmoulded rubber body
- Continuity Test
- Self diagnostic test
- Single Pole phase test
- Phase Rotation test
