Ultra-slip resistant sole. Excellent traction with ultra-slip resistant soles. Approved by both SRA (tested with soap on ceramics) and SRB (tested with glycerol on steel), which automatically achieves the best standard for slip-resistant soles SRC.

## Features & Benefits:

- The weight of the footwear is among the lowest on the market
- Elastic uppers of durable textile almost feel like an extra sock – they fit close and flexibly to the foot and deliver high comfort
- Removable insole with optimal arch support that can counteract the tendency to flat foot
- The front part of the shoe bends flexibly with the foot
- The composite toecap is completely free of metal. The composite material does not conduct heat or cold, so the composite toecap provides extra comfort in both hot and cold surroundings
- ETPU insert in the entire sole absorbs shock effectively, so the back and legs are protected with every step
- Shock-absorbing, soft and flexible two-component sole of PU/PU

Ultra-slip resistant sole. Excellent traction with ultra-slip resistant soles. Approved by both SRA (tested with soap on ceramics) and SRB (tested with glycerol on steel), which automatically achieves the best standard for slip-resistant soles SRC.

## Features & Benefits:

- The weight of the footwear is among the lowest on the market
- Elastic uppers of durable textile almost feel like an extra sock – they fit close and flexibly to the foot and deliver high comfort
- Removable insole with optimal arch support that can counteract the tendency to flat foot
- The front part of the shoe bends flexibly with the foot
- The composite toecap is completely free of metal. The composite material does not conduct heat or cold, so the composite toecap provides extra comfort in both hot and cold surroundings
- ETPU insert in the entire sole absorbs shock effectively, so the back and legs are protected with every step
- Shock-absorbing, soft and flexible two-component sole of PU/PU
- ESD Approved to DIN EN 61340-4-3: 2002 + DIN EN 61340-5-1: 2008

# KT65 Multifunction Tester

morethansafety

5551218

Proven multifunction tester combining the latest anti-trip technology, phase rotation, earth resistance & advanced memory, with easy to use functionality. Specifically designed for the UK market.

## Features & Benefits:

- Easy to use
- Phase rotation in line with new 18th Edition requirements
- Advanced memory with free software, eg you can save a continuity test as an r1, r2, rn, R2 or R1+R2 and on which circuit
- Powerful 18th Edition software available optionally from Castline Systems
- NEW Anti-Trip Technology for full no trip LOOP testing on all RCD types
- Test button in probe as well as lockdown test button for 'hands free' testing
- Easy PFC & PSC measurement without the need to alter test probes
- 250, 500 & 1000V insulation tests with auto discharge
- Additional LED for warning of high voltage output in insulation test mode
- Memory for test lead resistance compensation
- Backlit display
- Auto-test memory for RCD testing with all results shown on one screen
- Conducts phase to phase loop tests
- Earth resistance for earth rods (with optional Earth Spikes)
- End of line calibration certificate included
- Comes with easily removed and stored lid for excellent protection when not in use
- Can be used with rechargeable batteries
- Complies with BS7671 (Part P)

## Includes:

# KT66DL and EVSE Adapter Testing Kit

morethansafety

5552703

## Features & Benefits:

- The KT66DL has many great features including a low current two & three wire test and a 25A, 0.001 Ohm resolution high current test allowing for PSC readings of up to 50 kA.
- It has two special options of EV loop test currents to overcome sensitive inbuilt tripping devices. It also tests type B & EV RCDs and 6 mA RDC-DDs for time and tripping level.
- The user interface is flexible and enables you to do the RCDs tests as part of an auto-test or individually.
- The KEWEVSE enables electrical safety tests with the KT66DL by simulating the presence of an electric vehicle and opening up the supply circuits to enable testing. It facilitates the testing of single and three phase charging stations as well being able to simulate earth faults to test whether the charging point closes down.
- There are 4mm connectors and a BS1363 three pin socket to enable connection to your MFT. Red LEDs indicate which phases are live.

## EVSE Adapter

### Features & Benefits:

- Compact - smallest in class
- Easy to use
- Allows for the electrical safety checks of a charging point in conjunction with an EVSE enabled MFT, like the KT66DL
- Checks the functionality of the EVSE
- Used for commissioning and trouble shooting
- For use on single phase or three phase systems
- Type 2 male connector for EVSE connection
- 4 mm connectors and alternative BS1363 socket for connecting your tester
- CP & PP state adjustment rotary switches
- PE error & CP error simulation test
- Oscilloscope output
- Printed manual
- Carry case included

# Kewtech Smartpat PAT Tester

## Features & Benefits:

- Easy to use
- Converts into a full downloading PAT Tester with the KEWPAT APP
- Automatic test sequences - standard or make your own
- Large easy to read display
- Battery operated - approx. 1400 tests
- IT safe with 200mA earth test and 250V insulation option
- PASS / FAIL - Green / Red screens
- Run / leakage at supply voltage (110V or 230V)
- Portable RCD tests 10mA & 30mA
- Performs Earth bond at 200mA (IT safe)
- Converts into a full downloading PAT tester with the KEWPAT APP
- Automatic test sequences - make your own with the KEWPAT APP
- For fast data collection and results saving works in connection with the KEWPAT APP
- PASS / FAIL - Green / Red screens
- Appliance status pre-check
- Quick check continuity
- 5 second continuity
- 250 V and 500 V insulation
- Substitute leakage test
- Selectable substitute leakage limits
- Extension lead test
- Test lead nulling
- Back light
- Extension lead adapter
- Earth Continuity test lead with probe and croc clip
- Carry bag with handle
- Quick start guide

## Includes:

- Extension lead adapter (EZYLEAD)
- Earth continuity test lead with probe and croc clip (EZYEARTH)
- Mains Lead (EZYMAIN)

# 815 Class 2 Sound Level Meter

5500114

The testo 815 sound level meter can be used for control measurements in the air conditioning and heating area, on combustion systems or at workplaces.

## Features & Benefits:

- Heating technology: measurement of the volume of burners
- Industry and trade: measurement of machinery noise
- Event technology or public authorities: noise levels at events
- Building services: simple measurements by the caretaker when there are complaints
- Test whether the charging point closes down
- There are 4mm connectors and a BS1363 three pin socket to enable connection to your MFT. Red LEDs indicate which phases are live

# 540 Pocket Pro Lux Meter

5500143

## Features & Benefits:

The testo 540 light meter can be used to measure both artificial and natural light and provides you with a quick and easy means of measuring lighting conditions in the workplace.

The testo 540 light meter is a compact entry level model designed specifically for carrying out spot checks in the workplace, shops and offices. The light sensor is modelled on the spectral sensitivity of the human eye and is ideal for measuring lighting conditions in a variety of different workplaces.

The compact, easy-to-use meter has a number of useful functions and features including a large, easy-to-read display, min/max values which can be shown at the touch of a button, a hold function that allows you to freeze the last reading and a protective cap for safe storage.

# 410-1 Compact Vane Anemometer NTC Air Thermometer

morethansafety

5500116

The testo 410-1 includes a plug-on protective cap, as well as a wrist strap for secure measurement, and enables you to take advantage of the following functions:

## Features & Benefits:

- Single-point averaging: provides information on the average air velocity, e.g. at air outlets
- Hold function: is used to record the current values relating to air velocity and air temperature and compare them with each other
- Max/min values: get the minimum or maximum values since the anemometer was last switched on or reset, at the touch of a button
- Illuminated display: read off your readings even in dark environments
- Selectable units: for air velocity and temperature: m/s, km/h, fpm, mph, kts, Beaufort, °C, °F and wind chill

## Overview:

The testo 410-1 vane anemometer is impressive thanks to its practical pocket size and is ideal for fast check measurements. With a measuring range of 0.4 to 20 m/s, the anemometer can even be used for low flow speeds.

The anemometer has a permanently mounted vane with a diameter of 40 mm. You can therefore use it for the integral measurement of air velocity at ventilation grilles (air outlets).

The anemometer is practical for outdoor operation: as well as air velocity and air temperature, the testo 410-1 also calculates the Beaufort wind force and the wind chill temperature, which is the temperature perceived by a person due to wind-related cooling.

# 440 Air Velocity and IAQ Measuring Instrument

5551703

morethansafety

## Features & Benefits:

- A measuring instrument for all climate related parameters
- Extendible with a wide range of probes
- Wireless measurement with bluetooth probes
- USB interface for exporting measurement reports as CSV files
- Intuitive measurement menus
- Graphic display with parallel display of 3 readings

## Overview

Precise, reliable measurement of all air velocity and IAQ parameters with just one measuring instrument: the multifunction measuring instrument features intuitive operation with clearly structured measurement menus.

Adjusting air conditioning and ventilation systems, monitoring air quality or carrying out comfort level measurements – thanks to versatile options for combining with high-quality, digital probes, you are ideally equipped to carry out your measuring task (please order probes separately)

### General technical data:

Weight-250 g

Dimensions-154 x 65 x 32 mm

Operating temperature-20 to +50 °C

Connectable probes

1 x digital probe with cable or 1 x Temperature NTC TUC, 1 x digital Bluetooth probe or testo Smart Probe, 1 x Temperature TC Type K

Battery type 3 AA mignon 1.5 V

Battery life: 12 h (typically vane measurement)

# 610 Compact Humidity Temperature Meter

morethansafety

5501109

With its built-in NTC temperature sensor, the testo 610 thermohygrometer offers great accuracy when it comes to temperature measurement. The thermohygrometer measures humidity using its capacitive humidity sensor which is characterized by its long-term stability. The two sensors make the testo 610 a reliable and durable thermohygrometer.

The thermohygrometer is easy to use: the current temperature and humidity values are easily legible on the illuminated display. In addition, it can display the calculated dew point and wet bulb temperature, as well as min./max. values. With its clip-on protective cap, wrist strap and belt pouch, the handy thermohygrometer can be safely stored and easily taken along to any measuring location.

## Delivery Scope

testo 610 thermohygrometer, protective cap, calibration protocol, belt pouch and batteries.

# Blackline G7c Unit (Quoted spec for contract)

Contact us to specify your unit

Blackline Safety's G7c uses integrated 4G/2G or 3G/2G connectivity to wirelessly link your team to real people, while automating data analytics and compliance reporting.

All safety incidents are communicated to 24/7 live monitoring personnel who can mobilise responders to an employee's exact location or trigger an evacuation in real-time.

With a two-way speakerphone, monitoring personnel can communicate directly with the worker, providing critical insights and situational awareness for optimised emergency responses.

## Overview

With the testo 868s thermal imager, we have developed a thermal imager which makes work quicker and easier – without foregoing professional thermal imaging technology.

You can generate error-free and objectively comparable infrared images using its handy functions. The IFOV warner, testo Assist and testo Scale Assist mean you can avoid measurement errors and not only effortlessly achieve optimum setting of emissivity (and reflected temperature (RTC) for building thermography, but also of colour scale.

# Group Lockout Box

6030087

## Features & Benefits:

Global Standard for Simple Group Lockout and simplifies the lockout of larger machines. After the equipment to be worked on has been isolated from the energy source, the lockout keys are placed inside the multiple lockout box and then padlocked by the controlling person.

Each person then working applies their own unique padlock to the lockout box. Only when all unique padlocks have been removed (including the controller's padlocks) can the necessary keys be re-issued to re-start.

# Lockout Bag

6030072

This lockout bag is best used for locking out junction boxes and elevator controllers.

Simply slide the device inside, tighten the top of the bag and lock out the cord to ensure the bag cannot be pulled off. Made from wear resisting polyester cloth and features a PVC liner to prevent others from making contact with any buttons through the bag.

Can lock out many kinds of driving controller buttons or all kinds of special large sized plugs and accessories

## Features & Benefits:

- Bag dimensions 440 x 250mm
- Strap can be locked out by up to 6 padlocks or hasps

# Cylinder Tank Lockout

6030075

Prevents access to the main cylinder valve with no need to match your lockout device to varying diameter and threads of cylinder caps. Can be locked out by up to 3 padlocks simultaneously. The lock body front is suitable for writing on.

## Content:

- Maximum diameter neck ring of 80mm
- Padlock shackle diameter up to 7mm
- Made from engineering plastic PP

# Glassfibre Swingback Step Ladder

morethansafety

**6102965**

The Murdoch GRP swingback steps are manufactured to withstand vigorous every-day usage. Carrying the EN131 professional label means that the product has been tested to withstand at least 50,000 uses. The fibre-glass stiles makes this step your ideal partner when working around electricity. The spreader arm makes opening/closing of the stepladder simple, plus a heavy duty tool tray creates another user friendly touch.

## Features & Benefits:

- Tested to 30,000 Volts
- 80mm deep treads for comfortable standing
- 2 locking arms for safety and usability
- Large anti-slip feet for ultimate grip
- Load rating 150kg
- EN131 Professional

# Heavy Duty Professional Glassfibre Swingback Step Ladder

**6102183**

This range of ladders is ideal for trade use and is tested to a durability test of 50,000 cycles. Tested & certified to New EN131-2, Professional Improved stiles and strengthened treads as well as reinforced platform in-line with the new standard requirements.

Unique strengthening beam incorporated into non-slip treads, rubber feet, and twists as there are no tapes to snap, or flimsy arms to break. Rigid box section back legs with additional cross braces and 'k' straps for increased strength and stability.

Non conductive to 30,000 volts and so the ladder is ideal for use where electrical hazards exist.

Lower bottom tread to avoid bending of front feet. Plastic tool tray to hold tools and equipment while working.

# Leak Diverter Kit

morethansafety

4300874

## Overview:

Leaking roofs can damage valuable stock and equipment, not to mention the inconvenience of moving people and goods out of the way.

Leak Diverter deals with nuisance roof and ceiling leaks without disruption to the workplace until a permanent repair can be made. The device hangs from the roof directly under drips and leaks and diverts water to a convenient collection point. The floor beneath stays dry, the risk of slips and falls is reduced whilst damage to goods and machinery is minimised.

Adjustable hanging straps make levelling and positioning easy. Standard UK Hozelock fittings ensure water is safely channelled into the Leak Diverter reservoir drum (included in complete kit or available separately). Leak Diverter is available in four sizes in two colours, with separate accessories or as complete kit.

morethansafety

59073793

## Features & Benefits:

Electrostatically secured Wera Micro screwdriver 25-piece set. The included screw profiles are especially suitable for the use on mobile phones and tablets.

Safe protection against electrostatic energy and associated damage.

By supporting the hand on the rotating cap, and by the fast rotating zone below the rotating cap, lightning fast turning is possible.

The power zone with integrated soft zones ensures the transmission of high tightening and loosening moments.

Precision zone for correct rotation angles whilst adjusting.

The Black Point tip provides fitting accuracy and optimum corrosion protection. Take it easy tool finder with size stamping and colour coding by profile to find the required tool quickly and easily.

Storage and transport in a robust textile pouch, so the tool is well protected and always close at hand.

Time-consuming hand switching is eliminated.

# Stainless Torsion Bit Set (30 Piece)

morethansafety

59073616

## Features & Benefits:

Bit-Check that can be positioned upright with high quality bits out of stainless steel.

Wera stainless tools are manufactured out of stainless steel, thus preventing the formation of unsightly extraneous rust. 29 Wera stainless bits.

1 stainless Rapidaptor quick-release holder. The multi-component Bit-Check is convincing on account of its low weight and the maximum possible degree of compactness.

In this respect, the soft material in the lower section of the Bit-Check ensures that the bits are securely held whilst being simple to remove at the same time.

The profile and size of the bits are easy to recognise thanks to the Wera "Take it easy" Tool Finder with its colour coding and clearly visible imprint.
